- Custom retention period for deleted files and revisions.
- Granular user-access and security controls
- Revised file backup.
- Managed file sharing for internal and external parties.
- Multiple folder backup (Documents, Pictures, etc.).
- Continuous, real-time backup
- Bandwidth throttling.

Highlights

Access files from anywhere
Keep all of your files with you wherever you go. Connect updates and protects your work. Users can access their files from their laptops, tablets, and phones.

Collaborate with ease
Connect empowers users to collaborate on files using Team Shares. Anytime a file changes on a Team Share, everyone will have access to the most up-to-date version.

Share files securely
With a click of the mouse users can share files, set expiration dates, track downloads, receive notifications, and send messages.

Control your data
Connect tracks all user activity, including adds, deletes, and changes, making it easy to download and restore any deleted files and previous versions.

Eliminate FTP and VPN
No more cumbersome technologies. Connect allows business to cloud-enable their file server, minimizing dependence on FTP and VPN.
